DATE MAILED: 02/13/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

1		Application No.	plicant(s)					
	*	10/020,143	ALDUINO ET AL.					
•	Office Action Summary	Examiner	Art Unit					
		Nelson Moskowitz	3663					
	The MAILING DATE of this communication app							
Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status								
1)	Responsive to communication(s) filed on	·						
2a) <u></u>	This action is FINAL . 2b)⊠ Th	is action is non-final.						
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims								
4)⊠	Claim(s) 1-22 is/are pending in the application	1.						
	4a) Of the above claim(s) is/are withdrawn from consideration.							
5)	5) Claim(s) is/are allowed.							
6)⊠	S)⊠ Claim(s) <u>1-22</u> is/are rejected.							
7)	_							
8) Claim(s) are subject to restriction and/or election requirement.								
Application Papers								
9) 🗌 -	The specification is objected to by the Examine	er.						
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.								
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.								
If approved, corrected drawings are required in reply to this Office action.								
12) The oath or declaration is objected to by the Examiner.								
Priority under 35 U.S.C. §§ 119 and 120								
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).								
a) All b) Some * c) None of:								
	1. Certified copies of the priority document	s have been received.						
	2. Certified copies of the priority document	s have been received in Appli	cation No					
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.								
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).								
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

U.S. Patent and Tr PTO-326 (Re		ction Summary	Part of Paper No. 2					

Application/Control Number: 10/020,143

Art Unit: 3663

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 2, 8-15, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Tumminelli et al (see, *inter alia*, figures 1 and 5, and columns 3-4).
- 3. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peressini et al or Baer ('031) when taken with Thony et al.

In determining obviousness, the following factual determinations are made:

- a. first, the scope and content of the prior art;
- b. second, the difference between the prior art and the pending claims.
- c. third, the level of skill of a person ordinary skill in this art; and
- d. fourth, whether other objective evidence may be present, which indicates obviousness or nonobviousness. See, e.g., *In re Dembiczak*, 175 F.3d 994, 998, 50 USPQ2d 1614, 1616 (Fed. Cir. 1999) (citing *Graham v. John Deere Co.*, 282 US 1, 17-18, USPQ 456, 466-67 (1966)).

Objective evidence includes long felt but unmet need for the claimed invention, failure of others to solve the problem addressed by the claimed invention, and not other factors. See, e.g., Simmons Fastener Corp. v. Illinois Tool Works, Inc., 739 Fed. 1573, 1574-76, 22 USPQ 744, 745-47 (Fed. Cir. 1984).

Art Unit: 3663

- a) In examining the scope and content of the prior art it is found that Peressini et al and Baer ('031) disclose optical amplifiers using plural diode lasers to pump a waveguiding amplifying medium. The pumping is transverse the major axis of the amplifying medium.
- b) Thony et al teaches the use of VCSEL to pump laser amplifiers as they provide a better quality beam and better pumping efficiency. See, inter alia, columns 1, 2, 5 and 6 and figure 8.

Third, under *Deere* the level of ordinary skill in this art may be determined by the analysis of the Court as set forth in *Environmental Design Ltd. v. Union Oil Co.* 713 F.3d 693, 218 USPQ 865-69 (Fed. Cir. 1983) cert. denied, 464 U.S. (1984), where the court listed these factors relevant to the determination of the level of ordinary skill: type of problems encountered in the art, prior art solutions, rapidity of innovations, sophistication of technology, and educational level of the active worker in the field.

The types of problems encountered in the art involve multiplexing systems with plural wavelengths, the need for fiber amplifiers, and how to provide inexpensive, accurate and reliable signals.

Innovation in this field has been very fast as can be seen from virtual birth of this field in the 1950s to its present highly complex and sophisticated status.

Prior art solutions include semiconductor laser pumping of laser amplifiers, and the use of transverse pumping.

Application/Control Number: 10/020,143 Page 4

Art Unit: 3663

Skilled artisans generally have a graduate level education and over three (3) years of experience, as can be seen from published articles in the major journals in this field.

To date, no secondary consideration (objective evidence) has been presented.

Therefore, the use VCSEL pumps in transverse pumping for fiber amplifier systems would have been obvious to one skilled in the art for the aforesaid reasons.

- 4. References D-I (PTO-892) are cited to show prior art fiber optic amplifier systems employing transverse pumping by semiconductors.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson. Moskowitz whose telephone number is 703-306-4165. The examiner can normally be reached on Monday through Friday from 7:30 a.m. to 4:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (703) 306-4171. The before final fax phone number for the organization where this application or proceeding is assigned is 703-872-9326. The after final fax phone number for the organization where this application or proceeding is assigned is 703-872-9327.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.

NELSON MOSKOWITZ
